**A Report Submitted to the  
FISCAL AFFAIRS AND GOVERNMENT OPERATIONS COMMITTEE**

**Southern Legislative Conference**

**Council of State Governments**

John D. Carpenter  
Legislative Fiscal Officer

Prepared by:  
Monique Appeaning  
Fiscal Analyst/Special Projects Coordinator  
Louisiana Legislative Fiscal Office

John A. Alario, Jr., President  
Louisiana Senate

Taylor F. Barras, Speaker  
Louisiana House of Representatives

**2015**

This public document was published at a total cost of \$948 (\$3.69 per copy). 150 copies of this public document were published in this first printing. This document was published for the Louisiana Legislative Fiscal Office, Post Office Box 44097, Baton Rouge, Louisiana 70804 by the Louisiana Senate, Post Office Box 94183, Baton Rouge, Louisiana 70804 in an effort to provide legislators, staff and the general public with an accurate summary of Adult Correctional Systems Comparative Data for FY 15. This material was printed in accordance with the standard for printing by state agencies established pursuant to R.S. 43.31.

## ACKNOWLEDGEMENTS

My sincere appreciation to the legislative and correctional agency staff across the Southern Legislative Conference who provided the information that was used in the preparation of this report. Many thanks also to the Louisiana Legislative Fiscal Office, namely John Carpenter, Evan Brasseaux, Alan Boxberger, Willie Marie Scott, Matthew Labruyere, Debbie Roussel and Rachel Feigley. Last, but not least, thank you to Sujit M. CanagaRetna and the entire team with the Southern Legislative Conference, Council of State Governments.

# INTRODUCTION AND METHODOLOGY

## INTRODUCTION

This report is part of a series of annual comparative data reports presented to the Fiscal Affairs and Government Operations Committee of the Southern Legislative Conference (SLC). The information contained in this report is organized into ten sections, namely: Inmate Population Trends and Incarceration Rates; Prison and Jail Capacities; Budgetary Issues; Staffing Patterns and Selected Inmate Characteristics; Projected Costs of New Prisons; Probation and Parole; Rehabilitation; Prison Industries; Privatization; and State Profiles.

Each section of the report includes a summary of key findings, statistical tables and charts based on survey research involving each member state in the SLC. The fifteen states that make up the SLC are Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia and West Virginia.

## METHODOLOGY

The purpose of this report is to provide legislators and staff in each SLC state with a reference document that can be used to compare Adult Correctional Systems throughout the region.

A questionnaire was sent to each of the fifteen SLC states and each state provided a response. The data collected from the surveys were used to compile this report, unless noted. In addition to group reporting of like data, selected data from the states has been compiled into a "Corrections State Profile" for each state. These include, but are not limited to, selected characteristics of adult inmates and major state initiatives.

It should be noted that although identical surveys were sent to each state, there might be certain inconsistencies due to differences in interpretation of corrections data. We have attempted to adjust these inconsistencies when making comparisons among states. To the best of our ability this has been done with each state's prior approval.

**Note:** For purpose of this report "N/A" denotes that the requested information was not provided, was unknown, or was not available for reporting.

INMATE POPULATION TRENDS AND  
INCARCERATION RATES

## INMATE POPULATION TRENDS AND INCARCERATION RATES

### Summary of Key Findings

Table 1 provides historical data (1994-2015) on the number of inmates in the SLC member states. A region-wide yearly trend summary of the change in inmates housed in state correctional systems as of July 1 of each year is presented. The significant increase of 16.7% from 1994 to 1995 reflects the addition of Missouri to the SLC, while a decrease of 0.6% from 2009 to 2010 reflects the departure of Maryland from the SLC. From July 1, 2014, to July 1, 2015, the inmate population decreased by 6,653 or 1.15%. Finally, it should be noted that the 2014 data were revised based on adjustments provided by specific member states.

**TABLE I**  
Historical Trend Data of Adult Inmate Population  
(State Facilities)

Year	Number of Inmates (in state facilities)	Percent Change Increase/-Decrease
1-Jul-94	352,768

1-Jul-12	580,909	-0.80%
1-Jul-13	577,067	-0.70%
1-Jul-14	576,118	-0.16%
1-Jul-15	569,465	-1.15%

Table 2 illustrates the total resident population of the SLC states increased by 6.9 % from 111.9 M in 2005 to 119.6 M in 2015. During the same period, the number of SLC state inmates (including state inmates housed in local jails) increased by 7.0% from 599,181 to 641,285. The incarceration rate is described as the number of inmates per 100,000 population. The incarceration rate in the SLC region increased by 0.1% from 535.4 to 536.0. During the same period, the U.S. incarceration rate decreased by 4.8% from 510.4 to 485.8. Over the last decade, the SLC states' incarceration rate has remained above the U.S. incarceration rate, but the gap has widened from 25 to 50 inmates per 100,000 population.

**TABLE 2**  
A Comparison of Incarceration Rates

<b>YEAR</b>	<b>SLC Total Population (thousands)</b>	<b>U.S. Population* (thousands)</b>	<b>SLC Total State Inmates (incl. jails)</b>	<b>U.S. Inmates** in Prisons</b>	<b>SLC State Inmates/ 100,000 Pop.</b>	<b>U.S. Inmates/ 100,000 Pop.</b>
2005	111,912	296,410	599,181	1,512,823	535.4	510.4
2015	119,642	321,419	641,285	1,561,525	536.0	485.8
% change	6.9%	8.4%	7.0%	3.2%	0.1%	-4.8%

\*Population figures as of July 1, 2015. Source: Population Division, U.S. Census Bureau

\*\*U.S. figures as of December 31, 2014. Source: Bureau of Justice Statistics, Prison Inmates at Midyear

Table 3 on page 3 identifies the adult inmate population housed in state correctional facilities. From 2014 to 2015, the percent change in the inmate population for SLC states varied widely from a 5.7% increase in Arkansas to a 12.6% decrease in Mississippi. The table ranks SLC incarceration rates for adult inmates housed in state-only correctional facilities from 1 to 15, where 1 denotes the state (Oklahoma) with the highest incarceration rate (728.5) and 15 denotes the state (Kentucky) with the lowest incarceration rate (281.1).

Table 4 on page 4 and Chart 1 on page 5 reflect the change in the adult inmate population housed in state facilities from 2005 to 2015. West Virginia experienced the highest percent increase of 47.8%, while Mississippi experienced the highest percent decrease of 21.7%. From 2005 to 2015, the average percent change in inmate population for the SLC states from 2005 to 2015 was a 4.1% increase (Chart 2 on page 6).

## Summary of Key Findings

Table 5 on page 8 provides data for the combined total of state inmates housed in both state and local jails as of July 1, 2015, for the SLC states. The number of state inmates housed in local jails (53,591) represents 8.6% of the total inmate population of 623,056 housed in both state facilities and local jails. Of the fifteen SLC states surveyed, ten confined inmates in local jails. The table ranks SLC incarceration rates for adult inmates housed in state and local jails from 1 to 15, where 1 denotes the state (Louisiana) with the highest incarceration rate (820.2) and 15 denotes the state (North Carolina) with the lowest incarceration rate (372.3).

Table 6 on page 10 captures the inmate population and the capacity of state correctional facilities as of July 1, 2015. Six of the fifteen SLC states reported that the maximum design capacity was exceeded by the inmate population. Overall, the population for the SLC states was reported at 97 % of the maximum design capacity.

Table 7 on page 11 identifies the distribution of the adult inmate population by institution type based on security levels. States were asked to report the percent of inmates housed in various levels of security. The levels that ranged from one to three are as follows:

- A Level One institution is an institution with maximum-security inmates (extended lockdown and working cell blocks).
- A Level Two institution consists of medium-security inmates (working cell blocks).
- A Level Three institution contains minimum-security inmates only.

Of the 569,465 inmates in state prisons, 22.3% are housed in Level One institutions, 45.6% are housed in Level Two institutions, 17.3% are housed in Level Three institutions, 2.7% are housed in Community Based Centers, and 12.1% are housed in "Other" settings excluding local jails. (See footnotes to Table 7)

NOTE: On July 21, 2016 the state of Kentucky provided updated information for its 2015 maximum design capacity. This report reflects this information.

## \*Notes:

- (a) Alabama's "other" category includes in-transient, records monitor, and leased beds.  
(b) Georgia's "other" category captures the total distribution of adult inmate population.  
(c) Louisiana's "other" category captures the adult reception and diagnostic center inmates.  
(d) Mississippi's "other" category represents house arrest and earned release supervision.  
(e) North Carolina's "other" category includes safekeepers and unassigned custody.  
(f) South Carolina's "other" category includes psychiatric hospital, infirmary designations and authorized absences.  
(g) Virginia operates multi-level institutions where Level One is minimum; Level Two is moderate; and Level Three is medium. The "other" category includes close, maximum, restricted housing, transition, protective custody, death row, hearing impaired, and unassigned.  
(h) West Virginia's "other" category includes receiving and intake inmates.

Total		211,124	175,544		53,591		
Average	(k)					\$24.82	\$9,058

(a) Alabama's State Finance Department (not AL DOC) pays the flat rate reimbursement set by the legislature.

(b) Arkansas has a flat rate of \$28 per day for county jail backup and \$12 per day for contracted jail beds. The \$20 per day rate is the average of both.

(c) Florida DOC does not house state prisoners in local jails.

(d) Kentucky's flat rate is based on state policy and legislation.

(e) Louisiana reimburses all facilities at a flat rate of \$24.39 per day except for Work Release Facilities which are reimbursed at \$14.39 for non-contract programs and \$10.25 for contract programs, and one facility that earns an additional \$7 per inmate per day through an approved cooperative endeavor to provide and capitalize additional beds for the state. All parishes are also eligible to have approved extraordinary medical expenses reimbursed. Orleans Parish is reimbursed an additional per diem of \$2 for medical expenses for state inmates, \$7 for all inmates served by their mental health unit and \$3 per day for the Intensive Incarceration and Parole Supervision Program.

(f) Mississippi's state legislature and federal courts determine its capacity of approved jails to include the allotment of beds for state inmates.

(g) Oklahoma has 343 inmates waiting admission into custody that are under its jurisdiction.

(h) Tennessee has four types of reimbursements: contract fixed rate, contract reasonable allowable, fixed rate and resolution allowable.

(i) Virginia's Compensation Board provides payment to any locality that had an average daily jail population under ten in FY 95 an inmate per diem rate of \$22 per day for local responsible inmates and \$28 per day for state responsible inmates held in these jails in lieu of personal service costs for correctional officers.

(j) West Virginia's flat rate is based on West Virginia's Jail Authority statute and rule.

(k) The reported average reflects only the nine states reporting state payments by inmate day and years. Note: The July 1, 2015 computations were based on a 365 day year.

# BUDGETARY ISSUES

## **BUDGETARY ISSUES**

### **Summary of Key Findings**

Table 9 on page 15 provides the operating budgets for adult corrections with actual expenditure data reported for FY 05, FY 10, and FY 15, while projections were reported for FY 16. Over the past decade (FY 05 – FY 15), actual expenditures in the SLC region have increased by 32.54% from \$10.52 B to \$13.94 B.

Table 10 on page 16 and Chart 5 on page 17 delineate the FY 15 operating cost per inmate by institution type. The system-wide average annual operating cost per inmate was \$20,499 with North Carolina spending the most at \$29,160 (\$79.89 per day) and Louisiana spending the least at \$13,952 (\$38.22 per day). The system-wide annual operating costs per inmate varied across the SLC states by the type of confinement. Specifically, the average system wide annual operating costs by the type of confinement were as follows: \$22,578 for Level One; \$21,065 for Level Two; \$19,656 for Level Three; \$18,522 for Community Based; and \$18,615 for “Other”.

Table 11 on page 18 addresses the expenditure data for adult corrections in the SLC states. Two notable rankings are presented. The first ranking is associated with the expenditures per inmate for FY 15, where 1 denotes the state (North Carolina) with the highest expenditure per inmate (\$38,055), while 15 denotes the state (Kentucky) with the lowest expenditure per inmate (\$12,984). The second ranking is associated with the expenditures per capita for FY 15, where 1 denotes the state (North Carolina) with highest expenditures per capita (\$143.37), while 15 denotes the state (Kentucky) with the lowest expenditure per capita (\$62.11).

**TABLE 9**

WEST VIRGINIA	\$17,886	\$22,304	\$21,061	\$18,785	\$29,470	\$28,369	\$77.72
AVERAGE (c)	\$22,578	\$21,050	\$19,656	\$18,522	\$18,615	\$20,499	\$58.24

**Note:** A Level One Institution is an institution with maximum security inmates (extended lockdown and working cell blocks), medium and minimum security inmates. A Level Two Institution consists of maximum security inmates (working cell blocks), medium and minimum security inmates or an institution with medium and minimum security inmates. A Level Three Institution contains minimum security inmates only.

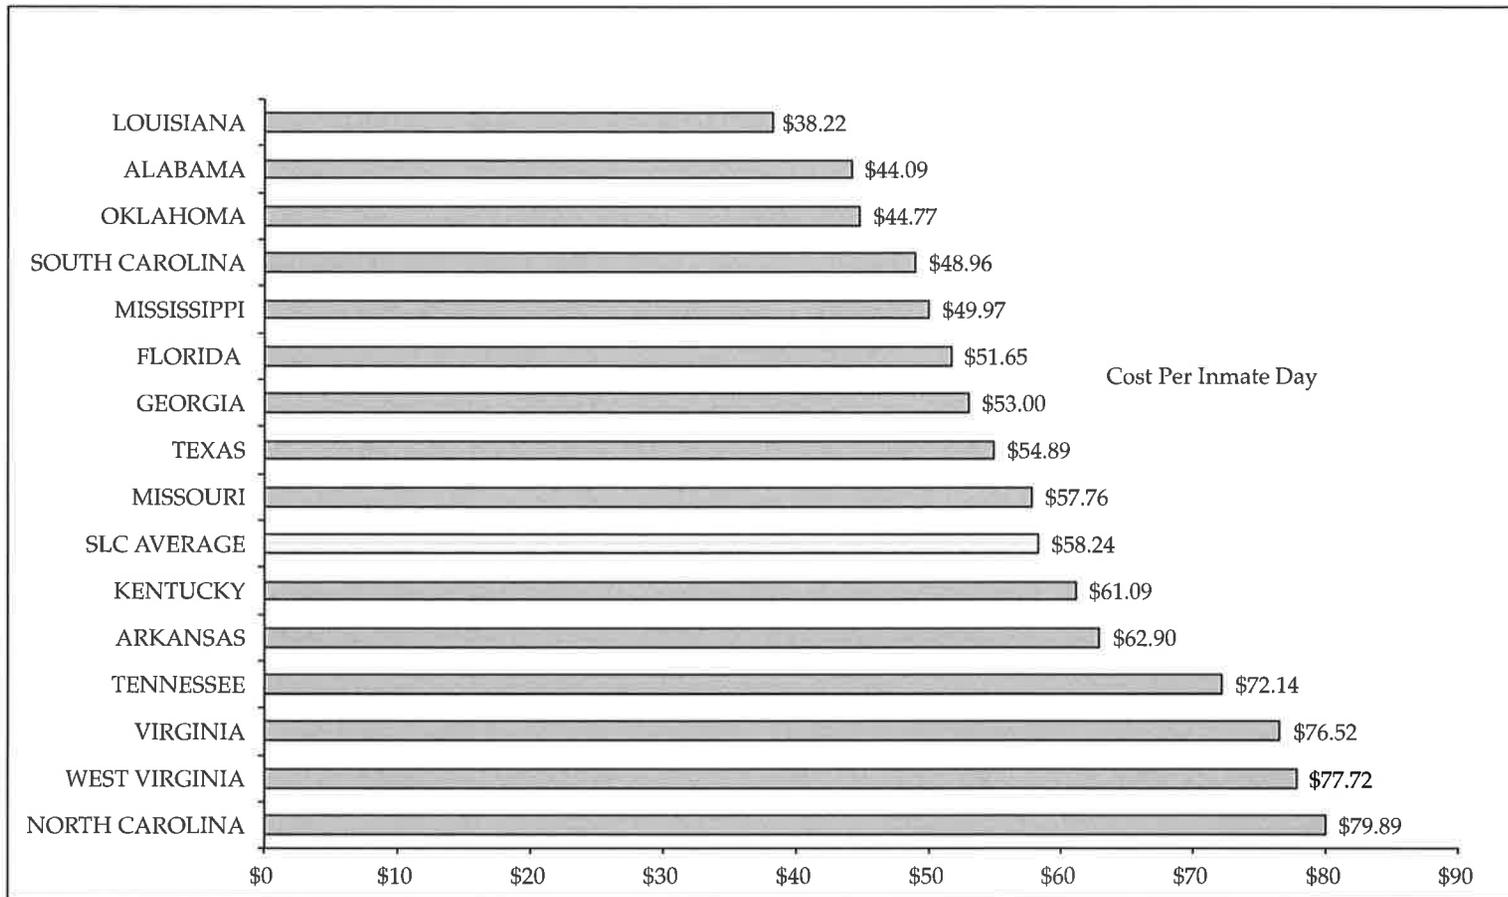

(a) Annual operating costs include those attributed to each corrections department. Expenditures associated with non-corrections budget units for inmate support are not included (i.e. headquarters, capital outlay, or probation and parole).

(b) Oklahoma's other category includes Other Work Centers at \$13,518, County Jails at \$14,219 and Halfway Houses at \$15,409. The average is reported above.

(c) Average calculation includes only those states that provided cost data within each type of institution (i.e. states reporting \$0 in "other" are excluded).

\*State and Local Jail Inmates as of July 1, 2015.

STAFFING PATTERNS AND SELECTED  
INMATE CHARACTERISTICS

## STAFFING PATTERNS

### Summary of Key Findings

Table 12 on page 20 details the staffing ratio patterns and starting salaries for the fifteen SLC states as of July 1, 2015. The states in the region were authorized employment of 105,782 security officers. As of July 1, 2015, approximately 87.9% of those positions were filled. There was an average of 6.1 inmates per filled security officer in the region. State staffing patterns varied from 3.6 inmates per filled security officer in North Carolina to 17.2 inmates per filled officer position in Oklahoma. The average starting salary of a security officer was \$27,139, not including related benefits. Table 12 identifies two SLC rankings. The first ranking addresses the inmate to filled officer ratio, where 1 denotes the state (Oklahoma) with the highest number of inmates per officer (17.2), while 15 denotes the state (North Carolina) with the lowest number of inmates per officer (3.6). The second ranking addresses the average starting salaries, where 1 denotes the state (Texas) with the highest average starting salary (\$31,248), while 15 denotes the state (Mississippi) with the lowest average starting salary (\$22,006).

Table 13 on page 22 provides data on adult correctional officers such as the average hours of classroom training (239), the average first year of employment on-the-job training hours (225) and the average turnover rate (25.2%) for the SLC states. States require an average of 38 hours of in-service training each year thereafter. Mississippi averaged the highest turnover rate of 48.2%, while Alabama averaged the lowest turnover rate of 15.7%. Table 14 reflects data on violent incidents, where the average number of assaults per 1,000 inmates was 14.3. Based on the survey data provided by the states, Arkansas had the highest number of violent incidents per 1,000 inmates at 67.51, while Louisiana had the lowest number of violent incidents per 1,000 inmates at 0.05. Collectively, the states reported a total of 8,141 assaults by inmates on other inmates and 3,846 assaults by inmates on staff.

Tables 15 and 16 on pages 24 and 25 provide data on selected characteristics of adult inmates where the average SLC demographic statistics are as follows: White (48.3%), Black (45.7%), Hispanic (4.7%), Other (1.9%), Male (91.3%), and Female (8.7%). Additionally, the average age at commitment was 34.2 years, the average sentence was 6.4 years, and the average time served was 3.2 years. There were 36,695 inmates admitted who were parole violators, 146,868 inmates serving sentences of 20 years or more, 25,628 inmates serving life without the possibility of parole, 1,464 inmates sentenced to death, and 32 executions. Finally, a total 278,251 inmates were released from custody in FY 15 for reasons that ranged from expiration of sentences to goodtime served.

**TABLE 12**  
**POSITIONS, STAFFING RATIOS, AND STARTING SALARIES (a)**  
**(as of July 1, 2015)**

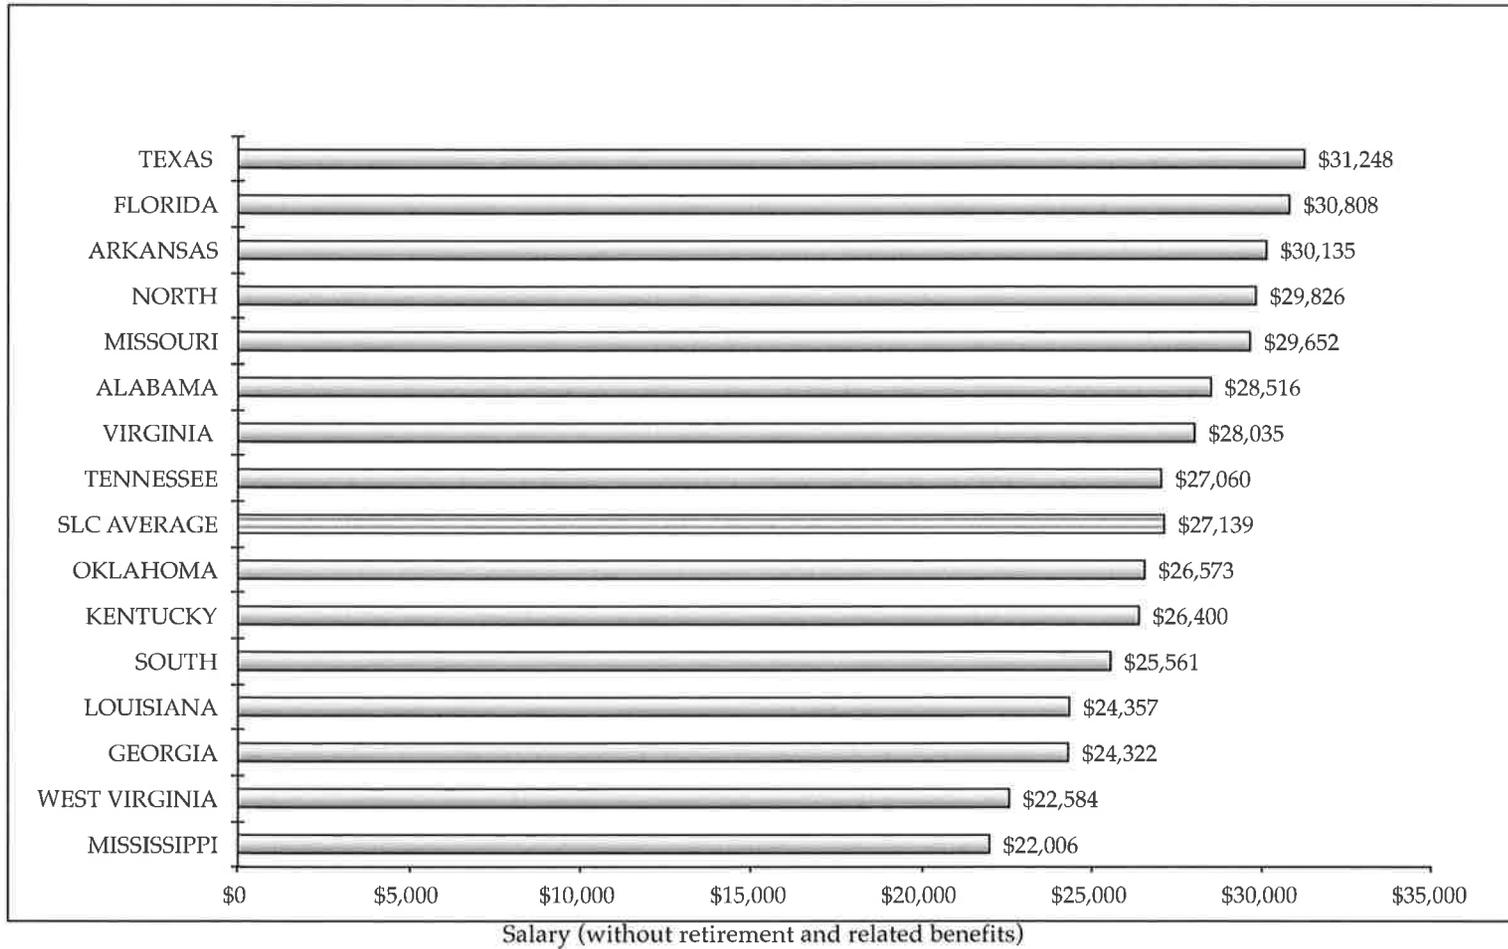

STATE	Correctional Officer Positions		Percent Filled	State Inmate Population 2015	Inmate to Filled Officer Ratio	Ratio Rank	Average Starting Salaries	Salary Rank

TENNESSEE	3,479	3,144	90.4%	20,358	6.48	6	\$27,060	8
TEXAS	29,069	25,440	87.5%	147,924	5.81	9	\$31,248	1
VIRGINIA	7,743	6,568	84.8%	30,379	4.6	14	\$28,035	7
WEST VIRGINIA	1,345	1,112	82.7%	5,840	5.3	12	\$22,584	14
TOTAL / AVERAGE	105,782	92,975	87.9%	566,394	6.09		\$27,139	

(a) Salary data is based on base annual salary and does not include retirement and other related benefits.

(b) Louisiana's Correctional Officer positions are for state run facilities; therefore, the inmate population was reduced by 3,071 inmates who are housed in 2 state facilities that are managed / operated by non-state contractors.

(a) Escapes from prison grounds.

(b) The Texas data are for calendar year 2015.

\* State's definition of assault, when provided:

*Arkansas* defines assault as an attack that results in physical injury ranging from minor bruises or cuts needing no first aid to death or serious harm requiring immediate hospitalization.

*Louisiana* defines assault as "with a weapon or with serious injury with or without a weapon."

*Mississippi* defines assault in part as "attempts to cause or purposely, knowingly or recklessly causes bodily injury to another."

*Missouri* defines assault as causing serious physical injury to another either with or without a weapon or through the use of any substance, instrument or device which can cause physical injury, causing a person to come into contact with or throwing/projecting feces or bodily fluids, or subjecting an employee to physical contact by kissing or touching sexual parts.

*North Carolina* defines assault as with weapon, assault of inmate/another with sexual intent, assault inmate with throwing liquids, fight involving weapons.

*South Carolina* defines assault as an unlawful attempt or offer to commit a violent injury to another.

*Texas* defines serious assault as assault on staff or an offender that requires treatment beyond first aid.

*West Virginia* defines assault as resulting in serious injury.

(a) Life without the possibility of parole.

(b) The Virginia data reported are for FY 14.

(c) West Virginia does not have the death penalty.

# PROJECTED COSTS OF NEW PRISONS

## PROJECTED COSTS OF NEW PRISONS

### Summary of Key Findings

Table 17 on page 27 provides data on the assumed projected construction costs for selected new medium security prisons in each SLC state if one were to be built. Based on the survey data, the average size of a planned facility was 1,495 beds at an average total construction cost of \$137.1 M. This equates to a weighted average construction cost per bed of approximately \$94,988. Tennessee reported the highest projected construction cost per bed at \$168,283, while Mississippi reported the lowest projected construction cost per bed at \$25,000.

Table 18 on page 28 captures the projected operating costs for selected new medium security prisons. The average maximum design capacity for the fifteen SLC states was 1,495. Alabama reported the highest maximum design capacity of 3,900, while Louisiana reported the lowest maximum design capacity of 500. The average number of positions (security and non-security) needed to operate a new medium security prison was 351. North Carolina reported the largest number of positions needed to operation a new medium security prison at 518, while Louisiana reported the lowest at 171.

The average annual operating costs was estimated at \$25.5 M with Alabama reporting the highest estimated annual operating costs at \$50 M, while Louisiana reported the lowest at \$9.4 M. The average operating cost per bed was \$17,546 with Tennessee reporting the highest annual operating cost per bed at \$23,407, while South Carolina reported the lowest average operating costs at \$9,716. Finally, the average number of inmates per security guard was 5.5.

(b) The SLC average excludes any state for which no data was reported.

# PROBATION AND PAROLE

## PROBATION AND PAROLE

### Summary of Key Findings

Table 19 on page 30 provides data on the probation and parole (P&P) population that totaled 1,290,236 comprised of 1,034,580 probationers and 249,786 parolees throughout the SLC. Texas reported the highest number of P&P offenders at 354,444 comprised of 266,371 probationers and 88,073 parolees. In contrast, West Virginia reported the lowest number of P&P offenders at 3,264 comprised of 989 probationers and 2,275 parolees. The total number of agents reported was 15,033 throughout the SLC. Texas reported the highest number of agents at 4,632, while South Carolina reported the lowest number of agents at 54. Chart 7 on page 31 reflects the caseload per probation/parole agent with Alabama reporting the highest caseload per agent at 209.1, while South Carolina reported the lowest caseload at 20. The SLC average was 104.8.

Table 20 on page 32 captures data for state inmates, probationers and parolees per 100,000 population. As of July 1, 2015, the SLC average number of state inmates per 100,000 population was 492 with Louisiana ranking the highest at 820 and Kentucky the lowest at 281. The SLC average of probationers and parolees per 100,000 population was 1,078 with Georgia ranking the highest at 1,751 and West Virginia the lowest at 177. The SLC average for total number of inmates, probationers and parolees per 100,000 population was 1,487 with Louisiana ranking the highest at 2,373 and West Virginia the lowest at 494.

Table 21 on page 33 provides data on probation and parole funding. The total funding for probation and parole across the SLC was \$1.58 B, while the average funding per state was \$105.1 M. A ranking of expenditure per offender is provided for the SLC states, where 1 denotes the state (Missouri) with the highest expenditure per offender at \$2,206, while 14 denotes the state (Mississippi) with the lowest expenditure per offender at \$625.

**TABLE 19**

(a) Probation and parole services are provided by a separate agency. A complete response was not received by South Carolina.

# REHABILITATION

## **REHABILITATION**

### **Summary of Key Findings**

Table 22 on page 35 provides data on inmate rehabilitation that includes adult basic education, literacy programs, vocational education, religious guidance, and on-the-job training by each SLC state. Fourteen states reported that they have Adult Basic Education and/or Literacy programs and provide some form of Vocational Education to inmates within their system.

The number of inmates receiving a General Educational Development (GED) certificate (or equivalent – i.e. Hi-Set) ranged from 30 in Alabama to 5,194 in Texas, while the percentage of inmates in state facilities receiving a GED ranged from 0.12% in Alabama to 5.35% in Oklahoma. On average, across the SLC, 3% of the budget was allocated to rehabilitation programs.

**TABLE 22**  
**INMATE REHABILITATION**

STATE	Average Monthly Enrollment					No. Receiving GED FY 15	% of Budget Allocated to Rehab Programs	% of Inmates (state facilities) Receiving GED
	Adult Basic Education	Literacy Programs	Vocational Education	Religious Guidance	On-The-Job Training			
ALABAMA	21	10	31	300	0	30	N/A	0.12%

TEXAS (c)	16,152	N/A	2,778	536,050	5,193	5,194	3.10%	3.51%
VIRGINIA	2,649	2,110	3,077	12,347	454	1,267	4.73%	4.17%
WEST VIRGINIA	N/A	N/A	N/A	N/A	N/A	159	N/A	2.72%
AVERAGE						950	3.00%	

(a) South Carolina awarded Vocational Certificates (2,835), WorkKeys (920), On-the-Job Training Certificates (1,658) and Employability Skills Curriculum (234).

(b) Tennessee reported administering the HiSet and not the GED. The HiSet demonstrates that a test taker has attained the academic knowledge and proficiency equivalent to those of a high school graduate.

(c) Texas combined Adult Basic Education and Literacy (16,152). Offenders are also involved in multiple Religious programs.

# PRISON INDUSTRIES

## **PRISON INDUSTRIES**

### **Summary of Key Findings**

Table 23 on pages 37-38 provides data on the various prison industries operated by the SLC states. All fifteen states reported maintaining a prison industries program. Total sales in all product lines reported by the corrections departments were approximately \$499.4 M, while the total net profit generated was approximately \$9.8 M. The operations employed 23,280 inmates, who worked an average of 5.93 hours per day. Table 23 includes whether states have a “state use law” requiring state agencies to purchase from prison industries.

**TABLE 23**

(d) Prison Industries are operated by an independent state agency, TRICOR (TN Rehabilitative Initiative in Correction), which receives no state-appropriated funds for the management of this program.

# PRIVATIZATION

## **PRIVATIZATION**

### **Summary of Key Findings**

Table 24 on pages 40-41 provides data on the different types of privatized services that were provided by the SLC states in FY 15. Privatization of services includes, but is not limited to the following: (1) Medical & Drug Treatment Services; (2) Halfway Houses, Community Rehabilitation Centers, and Work Release Centers; (3) Food Services; and (4) Management of Prison Facilities. The total value of the privatized services reported was \$2.014 B for 428,519 inmates with an average cost of \$39.70 per offender per day.

**TABLE 24**

**FY 15 PRIVATIZATION OF SERVICES**

State	Type of Services	Annual Value of Service	No. of Inmates/ Beds	Private Facilities	
				Cost per day per offender	% of state inmates
Alabama	Inmate Health Services	\$101,100,000	25,416

### COURT ORDER REQUIREMENTS

The Alabama Department of Corrections is currently under federal and state court orders for the year ending June 30, 2015. The state has been under state court order since 1999. The court order requirements include: removal of state inmates from county jails, creation of a secular substance abuse program and elimination of separate housing units for HIV positive inmates.

# ALABAMA CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

The Alabama Department of Corrections (ADOC) operates a 300-bed facility for aged and infirmed inmates. Compassionate release recommendations are submitted to the parole board on a case-by-case basis.

### Prison-Based Substance Abuse Treatment Programs

Alabama reported this was unknown.

### Pre-Release/Post-Release ("Re-entry") Programs

The programs focus on addiction, recovery, finances, family, health and law enforcement. They are as follows:

#### *Module 1: Addiction and Recovery*

The module provides information on understanding relapse, warning signs of relapse, and accessing drug treatment and halfway houses.

#### *Module 2: Job, Career, Communication and Financial Skills*

The module provides information on self-directed job search and career planning, communication skills, financial management, vocational training and resume writing.

#### *Module 3: Faith, Communication and Character-Building Skills*

The module provides information on faith-based resources/community linkages, spiritual enrichment and mentoring, relationship skills, character building and reintegration into society.

#### *Module 4: Health, Education, Screenings & Referrals*

The module provides information on preventive health education programs, health information and communication, referrals to clinics and medical centers, and gender specific health initiatives.

#### *Module 5: Family Re-Integration*

The module provides information on barriers and challenges in returning to family, child development and disciplinary issues, re-establishing intimacy and sexual relations, family development, conflict resolution and anger management.

#### *Module 6: Law Enforcement*

The module provides information on background checks, process release ID card and release papers, parole papers, bus ticket, ID verification, clothing, and information on existing warrants, misdemeanors and detainees.

### Evidence Based Program Participant

The state of Alabama is one of six states chosen by the National Institutes of Corrections (NIC) to train on "Thinking for a Change". NIC describes this as an integrated cognitive behavioral change program authored by Jack Bush, Ph.D. Barry Glick, Ph.D. and Juliana Taymans, Ph.D., with Michael Guevara, in cooperation with the NIC. The program incorporates research from cognitive restructuring theory, social skills development, and the learning and use of problem solving skills.

## ALABAMA CORRECTIONS PROFILE

Alabama reports it has a strong volunteer religious/secular base that contributes. Volunteers are usually the force behind housing, jobs, etc. Alabama reports that a small degree of its current programs affect positive outcomes related to recidivism but anticipates the 2016 NIC programming will yield greater results. Also, the state reports that there are no other funding sources other than general funds for all DOC programming.

# ARKANSAS CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

The Arkansas Department of Correction does not house elderly inmates based upon their age any differently than all other inmates. Some inmates require housing in medical barracks; however, that is not based upon their age, but upon their health. There is legislation that allows for early release based upon medical reasons that cannot be addressed within the Department, but age is not a factor. A Special Needs Unit was constructed by the Department at the Ouachita Unit in Malvern, Arkansas, which expanded the number of beds for all medical and mental health related issues for male inmates of all ages. A Special Needs Unit was constructed at the female facility in Newport, Arkansas as well.

### Prison-Based Substance Abuse Treatment Programs

The Arkansas Department of Correction provides alcohol and drug treatment services under licensure from the Department of Behavioral Health Services. Substance Abuse Treatment Programming (SATP) expenses for FY 15 are approximately \$1,919,275 (this amount includes federal funding of approximately 5%). It is funded by general state revenues. Arkansas has SATP, which is a minimum of 6 months residential treatment with a total of 563 beds at 7 units. There is also a 9-12 month Therapeutic Community treatment program that has 224 beds at 3 units, which is funded by a grant. Programs are evaluated daily through clinical supervision, with quarterly and annual audits by Office of Alcohol and Drug Abuse Prevention. Grantor requires a quarterly report, which includes a 3-year recidivism study based upon any arrest on new charges.

### Pre-Release/Post-Release ("Re-entry") Programs

Arkansas has a private program, Pathway to Freedom, modeled after the InnerChange Freedom Initiative (IFI) that was operated by Prison Fellowship for several years but was cut due to funding issues. Currently, Pathway to Freedom is available for male inmates and the state has a program available for the female inmates called Advanced Principal Application for Life Skills (APALs). These programs are voluntary pre-release programs that promote transformation from the inside out.

Arkansas also has a Community Based Re-entry Initiative Program that provides the necessary tools to assist inmates to successfully re-enter society, reduce the rate of recidivism, and ultimately reduce the costs to taxpayers.

The Arkansas DOC utilizes Re-entry Accountability Coaches who track the development of inmates in key areas throughout their incarceration. The Re-entry Accountability Coaches provide a copy of their final Report Card/Development Rubric and Program Achievements.

Arkansas has plans underway to initiate a Mentor recruitment drive. It also has an Ester Unit that will be a re-entry unit designed to offer targeted programming for inmates who are at medium to maximum risk for recidivism. Arkansas has started setting up a Re-entry Barracks at units to house certain inmates to offer programming geared to help prepare them for re-entry.

The Arkansas Community Corrections supervises parolees and provides post-release guidance and offers some transitional housing as it is available.

**COURT ORDER REQUIREMENTS**

The Florida Department of Corrections is currently under a federal court order for the year ending June 30, 2015. Florida DOC has been under federal court orders since 2010 and 2013. The court orders require the department to not use chemical agents on specific inmates. The department was ordered to provide a certified kosher diet to all prisoners with a sincere religious basis for keeping kosher.

# FLORIDA CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

The Florida Department of Corrections (DOC) does not house or treat inmates based solely on age. Elderly inmates are housed in most of the department's major institutions consistent with their custody level and medical status. The Reception and Medical Center has a 120-bed licensed hospital on-site in Lake Butler, Florida, and also cares for chronically ill and elderly inmates. The F-dorm at South Florida Reception Center features 84 beds designated for palliative and long-term care. The facility also provides a step-down care for inmates who can be discharged from hospitals but are not ready for an infirmary level of care at an institution. The South Unit of the Central Florida Reception Center is specifically designated for special needs inmates, including the elderly, as well as palliative care inmates. At Zephyrhills, two dorms are specifically designed for elderly inmates as well as inmates with complex medical needs. Lowell Correctional Institution has a dorm specifically designated for female inmates with complex medical needs, including the elderly. The South Florida Reception Center - South Unit includes 487 beds for inmates age 50+. Union Correctional Institution includes 156 beds for inmates age 50+. The Department has ten Transitional Care Units, which are inpatient mental health units where elderly inmates with impairments in mental and cognitive functioning receive necessary care in a safe and protective environment. Also, there are contracts with two private correctional health care companies to provide comprehensive health care services to more than 100,000 inmates statewide. Demand for bed space for elderly inmates with chronic medical needs is very high. While the private contractors provide care to all elderly inmates; the department retains responsibility for assigning and transferring elderly inmates with chronic medical needs to the specialty beds outlined above to ensure elderly inmates with the highest levels of acuity are placed in the most appropriate setting.

### Prison-Based Substance Abuse Treatment Programs

The Florida DOC has mandatory substance abuse program participation for certain inmates. An automated screening and priority placement system is in place to identify inmates meeting the criteria for the program and to prioritize them based on risk to public safety and severity of addiction. There are four primary categories of the inmate substance abuse programming: Intensive Outpatient, Residential Therapeutic Community, Program Centers and Work Release Centers. Total funding for all 4 programs was \$28,169,693 (\$26,674,642 state funds and \$1,595,051 trust/grant funds).

-Intensive Outpatient Programming is a 4-6 month outpatient (within prison setting) program at designated institutions for 1/2 day at least 4 days a week with a minimum of 12 hours of counselor-supervised activities.

-Residential Therapeutic Community is a 9-12 month program housed within an institution or a designated community-based facility that places emphasis on structure, limit-setting with consequences, responsibility, credibility, accountability, discipline and consistency.

-Program Centers have a 16-24 month program model designed to assist inmates nearing release to make successful transition to the community. Inmates who successfully complete the initial intensive programming component (9-12 months) are eligible to participate in the work release component. Program Centers offer a continuum of substance abuse services.

-Work Release Centers have contract substance abuse counselors operating in 13 department-operated work release centers to provide outpatient services (4 months in length) and aftercare services to inmates based on their identified needs. Inmates work in the community while attending treatment sessions in the evenings or on the days they are not working.

The evaluation and effectiveness of the substance abuse programs are monitored and tracked via annual comprehensive program evaluations, written reports, recommitment data and program success rates. The recidivism rates of the program participants are tracked and compared to those in the general inmate population.

## FLORIDA CORRECTIONS PROFILE

### Pre-Release/Post-Release ("Re-entry") Programs

The Florida DOC operates pre-release programs and provides post-release assistance for inmates to facilitate a smooth transition from prison to the community. The Bureau of Substance Abuse Program Services contracts with organizations in the community for the provision of the programs. Transitional housing programs assist newly released inmates in their transition from institution to the community by offering a structured and supportive environment. General revenue dollars support these programs. The performance outcomes and standards are outlined in the contracts.

1. 100-Hour Transition Program is a statutorily mandated comprehensive transition program that covers job readiness and life management skills. This training is provided to all inmates within the 18-month period prior to their release from a Florida prison. The curriculum includes evidence-based principles. General revenue of \$1,404,108 supports this program.
2. The Florida DOC operates three re-entry facilities and three re-entry centers. One of the main differences between a re-entry facility and other facilities is the involvement in the community. By locating inmates closer to their county of release, the department has been able to foster stronger connections with their families and community service providers. This includes but is not limited to transitional housing, continuing substance abuse treatment, basic necessities, and job placement services that provide a seamless delivery of services for transitioning inmates. These facilities are general revenue funded; however, \$2.25 M in federal grants were awarded.
3. In an effort to facilitate a smooth transition for returning offenders to the community, a Transition Passport (TAP) was developed. The pocket-sized booklet is a resource tool and is meant to be used as a guide to assist inmates during the transition period.
4. The Re-Entry Resource Directory is a user-friendly tool that enables a person looking for resources such as career counseling, debt management, substance abuse counseling, dental services, free clinics, shelters and many other services to find available resources within zip code, city, county or circuit.
5. Substance Abuse Treatment Services contracts with post-release transitional housing organizations to assist recently released inmates in their transition from institution to community.
6. The Veteran Dorm program is operating at 4 facilities and is designed to provide specialized services to the verified military service population. There are approximately 6,000 veterans in DOC custody. Veterans within 36 months of release are eligible for participation.
7. The department partners with the Department of Highway Safety and Motor Vehicles, Social Security Administration and Department of Health - Vital Statistics to assist inmates in obtaining a state identification prior to release. Released inmates with identification can immediately begin the process of searching for a job, finding housing, opening bank accounts, getting a driver's license and cashing checks.
8. Transition Services contracts with substance abuse providers to implement the "Parenting from the Inside" curriculum that focuses on parenting, goals of parenting, effective discipline, family communication, conflict resolution and negotiating, effects of parental incarceration, child maltreatment and protective factors.

# GEORGIA CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

The Georgia Department of Corrections (GDC) operates 12 infirmaries (10 male, 2 female) to provide sub-acute care to inmates. Of these, the August State Medical Prison service is similar in capabilities to a community hospital. Accommodative Housing, which is ADA compliant, is available in 4 facilities. These units provide: Preventive Care and Routine Screening Exams, Chronic Illness Clinics, Accommodative Living Units, on-site sick call, pill call, meals, and programs, hearing evaluation and aids, blind training / Brail reading (1 facility), physical, occupational, and recreational therapy and mobility training.

### Prison-Based Substance Abuse Treatment Programs

The GDC has 6 substance abuse treatment programs. They offer the following: Residential Substance Abuse Treatment Programs, Substance Abuse Aftercare Services, Central Georgia Technical College Customer Service, Matrix Early Recovery Skills, Model, Matrix Relapse Prevention Skills, and Motivation for Change. GDC evaluates by measuring three-year felony reconviction rates. Recidivism rates for those in the substance abuse programs are compared with those in the general population.

### Pre-Release / Post-Release ("Re-entry") Programs

The Florida DOC operates pre-release programs and provides post-release assistance for inmates to facilitate a smooth transition from prison to the Georgia partners and collaborates with several Community-Based Organizations and Faith-Based Organizations that provide pre-release and post-release services. Pre-release programming includes re-entry skills building and veterans re-entry program. Post-release programs include Faith and Character based program, Re-entry Partnership Housing and Transitional Centers.

Georgia partners and collaborates with several Community-Based Organizations and Faith-Based Organizations that provide pre-release and post-release services. Pre-release programming includes re-entry skills building and veterans re-entry program. Post-release programs include Faith and Character based program, Re-entry Partnership Housing and Transitional Centers.

Transitional Center provide offenders with their last 9 months at a site where they can get a job and apply life skills. All offenders go through the Re-entry Skill Building Program. Also Veteran Dorms, Faith and Character Based Dorms focus on both hard and soft skills for offenders. Funding for these programs is part of the state budget.

GDC recently opened an Evidence Based Learning (EBL) Prison that focuses on training and programming based on EBL principles. Funding for this initiative is the state budget as well a Second Chance Recidivism Grant. Also, the Governor's Office of Transition and Support works with releasing offenders in designated pilot sites to assist in the release of the offender with community coordinators, in-reach specialists and networking with local agencies. This is funded through the state budget and federal grant monies.

Kentucky does not segregate Hepatitis C inmates, but does have a Hepatitis Management Plan to address, prevent and control hepatitis viruses in the correctional setting.

### COURT ORDER REQUIREMENTS

The Kentucky Department of Corrections (KDC) is not currently under a federal or state court order.

# KENTUCKY CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

Kentucky reports that there are no special needs facilities, but some facilities have special needs units. No legislation has been enacted to address this issue.

### Prison Based Substance Abuse Treatment Programs

KDC utilizes a Therapeutic Community, pro-social model of substance abuse programming. This model includes cognitive-behavioral therapy and is measured for effectiveness by the University of Kentucky Center for Alcohol and Drug Research. KDC initiated Medically Assisted Treatment (MAT) for those individuals with a history of opiate use.

### Pre-release/Post-Release ("Re-entry") Programs

KDC re-entry efforts support offenders as they transition from prison to the community to improve their ability to successfully reintegrate into society without further criminal behavior. Re-entry coordinators located at each institution facilitate home placements; coordinate community partnerships; facilitate (Parolee Orientation Rehabilitation Training Assimilation Lesson) PORTAL New Direction (promising practice to address re-entry barriers); and assist offenders in obtaining birth certificates and social security cards.

KDC re-entry efforts support offenders as they transition from prison to the community to improve their ability to successfully reintegrate into society without further criminal behavior. Re-entry coordinators located at each institution facilitate home placements; coordinate community partnerships; facilitate (Parolee Orientation Rehabilitation Training Assimilation Lesson) PORTAL New Direction (promising practice to address re-entry barriers); and assist offenders in obtaining birth certificates and social security cards.

Probation and parole re-entry liaisons and facilities are located statewide throughout the districts. These entities coordinate community partnerships, assist with referrals to local services provided including possible employment and facilitate evidence based programs (Moral Recognition Therapy, Thinking for a Change, 24/7 Dads and PORTAL). Also, re-entry and liaisons work in partnership with 11 Re-entry Councils across the state.

## COURT ORDER REQUIREMENTS

The Louisiana Department of Corrections (DOC) is not currently under a federal or state court order.

# LOUISIANA CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

Reception centers for the Louisiana DOC are responsible for the initial medical and mental health screenings of offenders upon arrival. There are 3 facilities within the department that are considered to be a Level of Care 1 facility that provide extensive medical and mental health services. In addition to routine medical and mental health services, each facility also provides specialty clinic visits and diagnostic services, including basic radiology. Laboratory is also available.

Skilled nursing units (SNU) provide extensive inpatient medical services. The SNU at Elayn Hunt Correction Center has a 64-bed capacity; LA State Penitentiary has a 62 bed capacity and the LA Correctional Institute for Women has a 13 bed capacity.

These units also provide an End of Life Care program, Hospice, and Palliative Care for the patients that are terminally ill. These programs do not cost more and allow the offenders to make a decision in the type of care they receive. The extensive use of volunteers, family visits and the active role of medical staff allow the offender to have a dignified end of life plan.

There were currently 5,006 offenders over 50 years old in 9 state facilities and 2,270 housed in local jails. The annual cost for housing elderly offenders in DOC facilities is \$97,407,499 and \$20,208,335 in local facilities during FY 15.

Elderly offenders with chronic health care needs that do not require 24 hour nursing care are housed in a dorm that is handicap and wheelchair accessible to accommodate those with medical disabilities. Health care orderlies are assigned to assist offenders with activities of daily living in these areas. The offender can remain in the dorm longer without having to be admitted to the nursing unit for care.

Each institution has a Chronic Disease management plan. This program includes protocols and chronic care clinics for the management of offenders with chronic illnesses, including a minimum: hypertension, diabetes; congestive heart failure; hyperlipidemia and asthma/COPD.

The Keep on Person Medication Program is available to offenders for self administration of approved medications who can read, write and are allowed to handle medications.

### Prison-Based Substance Abuse Treatment Programs

Prison Based Substance Abuse Treatment Programs Every institution has substance abuse treatment and education programs. Each institution also provides pre-release counseling services. In addition, the residential pre-release "Blue Walters" drug treatment program is operating in cooperation with Richwood Correctional Center.

The Concordia Correctional Treatment Program in Ferriday, LA, is a 40-bed facility for male, adult offenders. Funded through grants from LA Commission on Law Enforcement received from the federal Residential Substance Abuse Treatment for State Prisoners (RSAT), and the Office of Addictive Disorders, the facility has been in operation since May 1997 and has treated upwards of 800 inmates with substance abuse problems. The program lasts for 90 days and inmates are placed in the program at the beginning of their final 90 days of incarceration. The ratio of clients to counselors in the program is 14:1, based on grant requirements from the Office of Behavioral Health.

## LOUISIANA CORRECTIONS PROFILE

### Pre-Release/Post-Release ("Re-entry") Programs

The LA DOC embraced the Transition from Prison to Community Model recommended as an evidence-based best practice by the National Institute of Corrections. This model establishes a continuum of assessment, classification / case planning, and programs designed to address the "criminogenic risks and needs" of offenders. "Criminogenic Risks" are those risk factors that research shows increase an offender's likelihood of recidivating and returning to incarceration. Criminogenic Needs are those needs that must be addressed to mitigate this risk of recidivism. Addressing criminogenic risks and needs is considered the best use of resources to increase the odds of success for the returning citizen. There are three phases to DOC's re-entry philosophy: 1) Getting Ready, 2) Going Home, and 3) Staying Home.

Getting Ready is also known as Reception and Diagnostics. This is the institutional phase where details of events and responsibilities occurring during the inmate's imprisonment from admission until the point of eligibility for parole or release is provided. This phase involves assessment and classification of risk, and need and responsivity are identified. Next re-entry programming assignments are recommended to reduce risk, address criminogenic needs, and build on strengths.

Going Home is the transitional phase. This phase begins before the offender's release date. Within three years of an offender's discharge date, eligible offenders participate in the Standardized Pre-Release Curriculum 2010, which is a complete re-entry program addressing topics such as readiness and employment preparation, money management and victim awareness to name a few. The program requires offenders to have identification, social security cards and birth certificates upon release, all of which increase their chances of being ready for employment right away.

Staying Home is the probation and parole / community corrections phase. This phase begins the moment the offender is released from prison and continues until he/she is discharged from community supervision. During this phase support is provided during the transition into the community. Supervision and Services provide flexible and firm supervision, identify and refer community programs and develop partnerships with volunteer groups, local law enforcement, faith-based groups and other community and service providers to assist them in maintaining stability. Revocation Decision-making offers structure and graduated responses to violations of supervision conditions. It also offers a range of alternatives to incarceration programs for offenders that commit major technical violations. Discharge and Aftercare identifies community stakeholders to assume responsibility for helping returning citizens to achieve case plan goals and continue to make positive, pro-social decisions. (Source: <http://doc.louisiana.gov/reentry-overview> )

Re-entry programs for state offenders at the local level are provided at 8 re-entry centers statewide. There are 21 transition specialists working in 25 local jails. There are also 25 dedicated sex offender treatment beds.

DOC was awarded the Justice Reinvestment Initiative - Maximizing State Reforms grant in 2014 to create and implement an automated risk, need, responsivity tool to inform structured decision-making and identify criminogenic needs for all criminal justice stakeholders. The next phase of the project involves automation of the tool, including integrating it with the offender case plan being developed in the Louisiana Prisoner Reentry Initiative. (Source: <http://doc.louisiana.gov/louisiana-prisoner-reentry-initiative>)

## LOUISIANA CORRECTIONS PROFILE

During the 2015 Regular Session of the Legislature, House Concurrent Resolution No. 82 authorized and directed the creation of the Louisiana Justice Reinvestment Task Force with three goals: 1) reduce correctional populations and associated correctional spending by focusing prison space on serious and violent criminals; 2) Hold offenders accountable more efficiently by implementing or expanding research-based supervision and sentencing practices; and 3) Reinvest savings into strategies shown to decrease recidivism, including improved reentry outcomes.

## COURT ORDER REQUIREMENTS

The Mississippi Department of Corrections (MDOC) has been under a Federal Court order since 1973 that requires a set number of state inmates in county jails. A 2012 Federal Court order requires youthful offenders (17 and younger and vulnerable 18 and 19) to be housed in units operated by MDOC and separate from other inmates among other requirements.

# MISSISSIPPI CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

Special needs, disabled and geriatric male inmates have a special housing unit at Mississippi State Penitentiary. Also MSP has a compassionate care unit for inmates who require end-of-life care. Mississippi Statutes (47-7-4) allow for conditional medical release of terminally ill and/or inmates with debilitating and incapacitating health conditions.

### Prison-Based Substance Abuse Treatment Programs

The MDOC provides short-term, long-term and therapeutic community programs for substance abuse treatment. The short-term program is a 12-week program for offenders with special needs (disability). The therapeutic community program is a long-term program available to offenders within 6 to 30 months of their earliest release date. There are alcohol and drug treatment programs that are funded by the Mississippi Department of Mental Health, the MDOC, and the Department of Public Safety. The program is evaluated by administering a pre- and post-test to measure progress during treatment. The Alcohol and Drug Program conducts a 3-year recidivism study of program participants to determine the average rate of return and length of time out of incarceration for participants that complete the program. The recidivism rates are not compared to those in general population.

### Pre-Release/Post-Release ("Re-entry") Programs

The MDOC has pre-release/job assistance programs for offenders who are within 2 years of their flat time or earned released supervision dates or within 6 months of their parole eligibility date in an institutional setting. The programs offer basic and remedial education, employability skills, readjustment skills, social skills, and GED preparation. The program assists the offenders in securing employment, residence, and community resources for re-entry into society. The program is funded by the Mississippi Department of Corrections and the Mississippi Community College Board.

# MISSOURI CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

In general, Missouri has its elderly inmates mainstreamed in the regular population. The Department of Corrections operates enhanced care units at three maximum security facilities and two medium security facilities. Inmates with long-term medical needs, including the elderly, are screened for placement in the enhanced care units. Medical services are contracted on a per diem basis for the entire population, so no specific medical costs are experienced. There is also no specific funding or legislation that addresses the elderly inmates. Missouri allows inmates with serious medical issues to be considered for parole.

### Prison-Based Substance Abuse Treatment Programs

\*Women's Eastern Assessment and Comprehensive Substance Abuse Treatment Center - (240 beds) substance abuse programming for women: \$49.23 per assessment, \$14.00 per offender per day, to include all other substance abuse services.

\*Western Reception Comprehensive Substance Abuse Services - 325 beds contracted for men, \$49.80 per assessment, \$8.94 per offender per day includes short term program services, intermediate program services and partial day treatment services.

\*Maryville Treatment Center - 525 beds, 300 of them contracted, substance abuse for men \$9.15 per day per offender, intermediate and long-term treatment programs.

\*Ozark Correctional Center Therapeutic Community Services - 650 beds for men, 12-month program, \$7.56 per offender per day for long-term therapeutic community programs.

\*Chillicothe Women's Treatment Center - 256 beds for women, \$14 per offender per day, includes Short-Term Program, Intermediate Program, Long-term Program, and Partial Day Treatment.

\*Northeast Correctional Center - 62 beds for men, intermediate program for 6 months and long term for 12 months, \$19.47 per offender per day for mobility adapted and special needs treatment.

Missouri Department of Corrections has a number of substance abuse treatment programs with services provided by the department substance abuse treatment staff. Currently, the department estimates the average cost per offender for all programs is approximately \$1,100 that includes the Boonville Treatment Center, Cremer Therapeutic Community Center, Fulton Reception Diagnostic Correctional Center, Farmington Treatment Program, and Western Regional Treatment Center.

### Pre-Release/Post-Release ("Re-entry") Programs

The Missouri Department of Corrections offers more than 200 programs within their institutions, that if an offender qualifies for and participates in can assist them in gaining and enhancing skills/tools that can aid in becoming more successful, productive community members. Programs range from topics to gain better parenting skills, impact of crime on victims, anger management, cognitive skills (Pathway to Change), education programs, trauma, family reparation, employment skills, etc. The department also offers many vocational trade programs to prepare offenders for work in the community, and if the offender does not have housing, the department works to locate appropriate housing. Employability Skills is included in Missouri's programming. This program includes a video resume module for offenders to show employers what they have to offer in way of skills and may allow an offender to obtain an interview prior to release or have an interview set up soon after release.

### COURT ORDER REQUIREMENTS

The North Carolina Department of Corrections (NCDOC) is not currently under a federal or state court order.

# NORTH CAROLINA CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

NCDOC's Randolph Correctional Center can accommodate up to 100 inmates in a long-term care facility.

### *Medical Release of Inmates*

NC law allows for the parole of 65 years or older terminally ill inmates projected to be within six months of death; or permanently and totally disabled inmates, except those convicted of class A and B crimes (primarily 1st and 2nd degree murder) or those who have to register as sex offenders at release.

### *Custody and Control of Prisoners*

North Carolina authorizes prisoners to leave place of confinement. The Secretary of the Department of Public Safety may extend the limits of confinement for terminally ill and permanently and totally disabled offenders to receive palliative care. Offenders must be minimum custody, terminally ill (within 6 months of death) and/or permanently and totally disabled.

### Prison-Based Substance Abuse Treatment Programs

The NC DOC has the following substance abuse treatment programs:

*Prison-based programs within the Division of Alcoholism and Chemical Dependency Programs (DACDP)* are operated within selected minimum and medium custody prison units. Eligibility for DACDP prison-based treatment programs is established during diagnostic processing and utilizes the Substance Abuse Subtle Screening Inventory as a severity indicator for substance abuse problems. Programs are based on Cognitive-Behavioral Interventions and encompass two service levels: intermediate and long-term treatment services. Intermediate treatment programs provide intensive outpatient services for 90 days in 10 prison facilities across the state. Long-term intensive treatment programs in 6 prison facilities range in length from 120 - 365 days and are designed to treat the seriously addicted inmates who are in need of intensive treatment.

DACDP prison-based program costs: the average cost per day per inmate in a prison-based program was \$74.57 in FY 14 and is based on both program and custody costs. DACDP program cost per day per inmate was \$15.90. DACDP operates 3 prison-based programs with a federal Residential Substance Abuse Treatment (RSAT) grant which provides 75% of the funding with a state match of 25%.

The effectiveness of substance abuse programs are measured by assessing if: substance abuse services are provided to the inmates who are identified as needing treatment; a sufficient number of inmates who enter the programs actually complete the program; the completers are continuing their recovery through group meetings and other activities; and the inmates who complete the pre-release community transition programs are still active in the recovery process upon release from the Department.

Additionally, participants are tracked in the programs through a separate treatment substance abuse module, ACD, which interfaces with the inmate tracking system used by prisons, OPUS. The North Carolina Sentencing Commission compares the recidivism rates for those in substance abuse programs to those inmates in the general population to see if there is a difference.

### Pre-Release/Post-Release ("Re-entry") Programs

North Carolina does not have a specific statewide pre-release program but is currently in the process of enhancing procedures by implementing components of evidence based practices. Additionally, North Carolina is working with a number of community based organizations to provide re-entry services in the community. Offenders are provided with 2 pieces of identification upon their release and each offender receives a Transition Document upon release.

## NORTH CAROLINA CORRECTIONS PROFILE

North Carolina offers a variety of programs to help prepare offenders for the transition:

- Community Volunteer Program
- Community Leave Program
- Work Release Program
- Home Leave Program
- Vocational Programming
- Post Release Referrals
- Correction Enterprises
- Inmate Construction Program
- Office of Re-entry and Transition Services

## COURT ORDER REQUIREMENTS

The Oklahoma Department of Corrections (DOC) is not currently under a federal or state court order.

# OKLAHOMA CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

Elderly offenders are housed in various units across the DOC. Those offenders who cannot function in the general population are housed in an infirmary (48 infirmary beds are available and distributed among 4 facilities). At Joseph Harp Correction Center there is an ADA compliant unit for special needs offenders. Additional infirmary beds have been requested for long term care of eligible offenders. Medical costs for offenders double at age 45, again at age 65, and again at age 85. Total medical costs in FY 14 were \$84,411,263 for a population of 25,645 for a total cost per day of \$9.04.

### Prison-Based Substance Abuse Treatment Programs

The DOC utilizes evidence-based research in the design and delivery of substance abuse treatment (SAT) to offenders. All SAT programs currently utilize a cognitive behavioral model of treatment. Placement into SAT programs is based on an assessed need score. SAT programs vary in length from 4 months to 1 year. DOC spends a total of \$0.8 M in federal and state funds on SAT, excluding personnel and operating expenses (DOC funds approx. \$500,000). Oklahoma DOC has 18 substance abuse treatment programs statewide. Seven are funded in part through Residential Substance Abuse Treatment (RSAT) and Justice Assistance Grants (JAG). Two programs receive Special Population Treatment Unit (SPTU) funds to assist in costs associated with treatment services. Nine substance abuse treatment programs are fully funded through DOC operating funds.

### Pre-Release/Post-Release ("Re-entry") Programs

The Oklahoma DOC does not consider re-entry to be a program but a process that encompasses various methods of addressing the needs of the offender. At reception, an offender's needs are assessed to identify criminogenic behaviors and referrals to meet the basic needs upon release. The method by which an offender receives re-entry services is dependent upon the individual offender. Each offender will have participated in at least one of the following prior to release:

- 1) Institutional Pre-Release - The facility case managers ensure the offender has the support and necessary contact information to access community resources based on their individual needs. Case managers assist in securing the appropriate identification necessary to access benefits, services, and employment in the community.
- 2) Community Corrections - Offenders eligible for community corrections prior to release receive reentry services at those facilities. Services include work programs, substance abuse aftercare, continuing education, transportation resources, and reestablishment of family and community ties.
- 3) In Reach - Any group that comes into a facility in order to work with an offender in creating a pre-release plan prior to release. Examples of In Reach organizations are: faith based groups, tribal groups, other state agencies, and staff of non-profit organizations designed to assist offenders with basic re-entry services.
- 4) Mental Health Reentry Program - DOC and the Oklahoma Department of Mental Health partner to better transition offenders with serious mental illness into appropriate community based mental health services following discharge from prison. DOC also partners with the Oklahoma Department of Social Services to help obtain federal benefits for offenders with disabling serious mental illness.

The DOC was a successful applicant for Second Chance Act funding and has developed a program located at the Oklahoma City Community Corrections Center since April 2010. The program is designed to remove barriers to re-entry and reduce offender recidivism. The number of program participants is 495 through May 2016.

-------------------------------	--

The South Carolina Department of Corrections does not segregate or isolate Hepatitis C inmates. An infection control coordinator monitors Hepatitis C inmates with the help of medical staff to distribute information along with monthly chronic care clinics at institutions.

### COURT ORDER REQUIREMENTS

The South Carolina Dept. of Corrections is currently under a federal court order and has been since 1999. The court requires South Carolina to allow certain inmates to have access to literature (but only in Administrative Segregation), limits the use of drug dogs to search visitors and places limitations on inmate labor for certain construction projects, and HIV positive inmates will be housed in general population and eligible for all programs.

# SOUTH CAROLINA CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

All elderly and infirm inmates committed to the South Carolina Department of Corrections are given a medical and mental health assessment upon admission. A treatment plan is developed and the inmate is assigned to an institution according to his medical or mental health needs. South Carolina has two handicapped units for inmates that have ambulating, hearing, or sight problems, and assisted living unit for inmates that need assistance. There are 3 infirmaries for any inpatient care needed which includes a chronic care infirmary for the inmates that can no longer care for themselves. If the South Carolina Dept. of Corrections infirmaries cannot provide the services, the inmates are admitted to a community hospital for more intensive care. No legislation has been enacted to address this issue and individual inmate costs are not tracked.

### Prison-Based Substance Abuse Treatment Programs

The South Carolina Department of Corrections has the following substance abuse treatment programs:

*Goodman Addiction Treatment Unit:* 45-bed residential program for female and youthful offenders with 6-9 months of treatment using the Therapeutic Community Model (\$187,496 State Funds).

*Horizon Addiction Treatment Unit (at Lee Correctional):* 256-bed residential program for male adult offenders with 6-12 months of treatment using Therapeutic Community Model (\$380,983 State Funds).

*Correctional Recovery Academy (at Turberville Correctional):* 188-bed residential program for young male offenders (ages 17-25) with 6-9 months of treatment using the Therapeutic Community Model (\$299,340 RSAT/State Funds).

*Camille Griffin Graham Addiction Treatment Unit:* 48-bed residential program for female offenders with 6-9 months of treatment using the Therapeutic Community model (\$25,925 RSAT Funds).

### Pre-Release/Post-Release ("Re-entry") Programs

A 30-day pre-release and work program was operated at Watkins Pre-Release Center until 2012. In 2012, the Manning Correctional Institution became the new site for a statewide pre-release program which dedicated 600 beds to the project and expanded the 30-day concept to 180-days of programming, training, and release assistance for departing offenders. Education services were increased to offer GED, Vocational Training, and Work-Keys to the designated pre-release inmates. Life Skills, programming utilizing social service organizations and volunteers from the community, offers their expertise in assisting with the re-entry efforts. Classes are specialized to offer the offender what is needed to be successful upon release.

DOC has partnered with the South Carolina Department of Employment and Workforce to operate a "One Stop Shop" where the offender receives employability readiness classes and assist with employment searches and placement.

# TENNESSEE CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

Elderly or infirm inmates are assigned housing based on their physical and mental needs and the resources of the facility. Inmates requiring either intermediate or skilled nursing care are generally housed at the DeBerry Special Needs Facility (males) or Tennessee Prison for Women (females). These facilities also house inmates with chronic diseases or acute mental health conditions that require close monitoring, regardless of their age. There is no special funding or separate facilities for elderly or infirm inmates. There is no state legislation addressing the care of the elderly or infirm who are incarcerated.

### Prison-Based Substance Abuse Treatment Programs

TDOC has a number of substance abuse treatment programs:

Group Therapy is a 4 1/2 to 5 month program designed to treat offenders with a medium need for substance abuse programming. The program is performed in addition to daily duties.

Parole Technical Violator Diversion Program is only offered at one facility and runs in conjunction with the Therapeutic Community program at the facility. The program lasts 6 months, covers the same topics as Therapeutic Community, but is only for parole violators.

TDOC tracks all substance abuse program participants. Program assignments, terminations, completions, and attendance are tracked through the Tennessee Offender Management System. TDOC can identify program participants who return to state custody.

### Pre-Release/Post-Release ("Re-entry") Programs

Career Management for Success is a 12-week course to teach offenders subjects that are critical for offender success and a safer community. Offenders within 24 months of release are eligible and all services are state funded. Topics include: - job search, housing, parole hearings and success while on parole, conflict management victim impact and thinking for a change.

Chattanooga Female Release Center is a 42-bed partnership between TDOC, the Board of Probation and Parole, and a non-profit service provider. The services provided include life skills, victim impact, and short term re-entry services.

The Parole Technical Violators Diversion Program (PTVDP) is a 75-bed program that runs in conjunction with the Substance Use Therapeutic Community Program. The program lasts 6 months on average and addresses the same topics covered in the standard substance use therapeutic community programs in other facilities. This program is designed for parole violators with intensive substance use issues. Placement in this program can only be made through parole board recommendation. Services are state funded.

# TEXAS CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

Certain units have been designated housing areas for geriatric offenders with less severe medical issues, one facility has been designated for geriatric offenders with moderate medical issues, and one 60-bed sheltered housing unit serves geriatric offenders with more significant medical issues. State legislation, which established the Medically Recommended Intensive Supervision Program, provides an alternative to continued incarceration for some offenders with significant medical issues.

### Prison-Based Substance Abuse Treatment Programs

The Texas Department of Criminal Justice (TDCJ) has established the following forms of Substance Abuse Treatment Programs:

(1) *Substance Abuse Felony Punishment Facilities (SAFPF)*: An intensive 6-month Therapeutic Community program sentenced by a judge as a condition of probation or as a modification of parole/probation. The program consists of orientation, main treatment, and re-entry. Offenders may also participate in peer support groups. FY 15 expenditures for this program were \$42,510,076.

(2) *In-Prison Therapeutic Community (IPTC)*: 6-month intensive therapeutic community treatment program for offenders approved for parole contingent upon completion of the program. FY 15 expenditures for this program were \$18,064,427.

(3) *Pre-Release Substance Abuse Program (PRSAP)*: An intensive 6-month treatment program for offenders with serious substance abuse/dependency and antisocial characteristics from Institutional Division Units. These offenders are within 6 months of release as identified by the Texas Department of Criminal Justice Classification, and Parole Division. Treatment modality is similar to Substance Abuse Felony Punishment Facilities, but is much more condensed. Offenders may participate in peer support groups. FY 15 expenditures for this program were \$1,321,355.

(4) *Pre-release Therapeutic Community (PRTC)*: An intensive 6-month program for offenders in a therapeutic community setting which provides pre-release services. The PRTC is comprised of 3 primary components: substance abuse treatment, cognitive restructuring, educational and vocational training. FY 15 expenditures for this program were \$874,842.

(5) *In-Prison Driving While Intoxicated (DWI) Recovery Program*: A program to adequately address the scope of needs within the In-Prison DWI Recovery program. The best practice approach utilizes a multimodal design that will accommodate the diversity of needs presented in the population to maximize the potential of success for each offender. FY 15 expenditures for this program were \$1,612,566.

(6) *State Jail Substance Abuse Program (SJSAP)*: This program was instituted to provide rehabilitation services for those offenders who are confined in a State Jail Facility. To be eligible an individual must be confined in a state jail, within 4 months of release, and in general population. Offenders are placed in one of two tiers: 90 or 120 days based on offender's state of readiness and progress. The FY 15 expenditures for this program were \$2,397,182.

### Pre-Release/Post-Release ("Re-entry") Programs

The Texas Department of Criminal Justice has a variety of pre-release and post-release programs. For offenders being released on supervision, a residential placement is approved by parole officers. This placement may be a private residence or a halfway house under contract with the department.

*InnerChange Freedom Initiative*: This program is offered by the Prison Fellowship Ministries at no expense to the offenders. Male offenders who are within 18 to 30 months of release volunteer for this program. The program uses biblical principles to assist offenders in making good moral decisions and applying biblical values to life situations. Six months of aftercare is provided by the Parole Division and the Program's Aftercare Office.

## TEXAS CORRECTIONS PROFILE

*Faith Based Dorms:* Faith based dorms were implemented in March 1997 and have expanded to 78 facilities. The 88 dorms offer support and accountability, along with an intensive faith based curriculum and mentoring program. The programming is conducted by local faith based community volunteers whose activities are directed by the unit chaplain and unit administration.

*Our Roadway To Freedom Program:* A 6-month program for offenders who volunteer in an intervention and recovery for offenders with a prostitution charge, or who self report a history of prostitution or associated activities, domestic violence or victim of human trafficking. The program is housed in Plane State Jail with a bed capacity of 114 offenders. For FY 15, 193 offenders completed the program.

*Bible College:* In conjunction with the Texas Department of Criminal Justice, the Southwestern Baptist Theological Seminary College offers a 4-year accredited bachelor's degree at no expense to offenders. The program is available to offenders of all faith preferences or no faith preferences.

*Serious and Violent Offender Re-entry Initiative Program:* The SVORI program is offered to offenders that will be released to parole, mandatory supervision, and flat time administrative segregation offenders. The program is designed to reduce recidivism by better preparing and assisting offenders confined to administrative segregation to successfully re-enter their communities.

*Sex Offender Education Program:* Offenders who are within 2 years of release are selected to participate in this program. Priority is given to offenders who are assessed as low-risk to re-offend. Offenders participate in didactic education programming for 3 to 4 months.

*Sex Offender Treatment Program:* Offenders who are within 18 months of release are selected to participate in the Sex Offender Treatment Program. Priority is given to offenders with two or more convictions for a sex offense, who are being discharged and will be released without supervision. The program operates in a therapeutic community and uses a cognitive based treatment modality. Priority is given to offenders who are assessed as high risk to re-offend.

*Wraparound:* For offenders who are not being released to supervision, community service providers are recruited to meet with offenders and develop community resource plans to assist in meeting their needs at the time of their release. Offenders are interviewed by staff to determine their needs prior to their release.

*Civil Commitment Treatment Program:* This is a pre-release program designed to prepare offenders that have been civilly committed as sexually violent predators for transfer to the Texas Civil Commitment Center upon release from TDCJ custody. The capacity is dependent upon the number of qualifying participants and duration of the program is dependent upon the time each has to participate by not exceed 18 months.

*Baby and Mother Bonding Initiative (BAMBI):* This program provides residential settings for state jail confinees and their newborn infants. The initiative allows time to form a healthy attachment in a secure setting with a strong training and education program for the mother. The mother also receives substance abuse education, life skills, infant first aid and CPR, nutrition, anger and time management, and if appropriate GED classes and test-preparation. The program is in a residential facility for up to 20 new mothers. During FY 15, 34 women completed the program.

*Texas Correctional Office on Offenders with Medical or Mental Impairments (TCOOMMI):* The TCOOMMI Continuity of Care Program provides pre-release screening and referral to aftercare treatment services for special needs offenders. The referral process begins up to 6 months prior to the offender's release into the community.

*Gang Renouncement And Disassociation (GRAD):* The GRAD process is a 9-month program that provides a safe and secure environment for offenders who choose to voluntarily renounce their gang affiliation through a structured process to reintegrate in to general population.

## TEXAS CORRECTIONS PROFILE

*Re-entry and Integration Division (RID):* RID provides re-entry services for eligible offenders through a 3-Phase program. Case managers conduct screening and contact eligible offenders to offer each phase of the program. The program is voluntary and is designed to address offender needs including: identification, housing, employment and education, health care, substance abuse, transportation, clothing, food & amenities, financial resources, and support systems.

*Administrative Segregation Pre-Release Program (ASPP):* ASPP is a collaborative effort to provide programming to level 1, 2 and 3 offenders who are going to be released to the community from administrative segregation. The 90-day program curriculum includes a variety of topics (anger/stress management, social skills, healthy relationships, preparation for and maintaining employment, spirituality, gang intervention, substance abuse, and limited basic education) utilizing cognitive intervention strategies, which are developed to target criminogenic needs thereby impacting risk and enhancing re-entry opportunities for the offenders upon release. The program currently has a capacity of 204 offenders. The 90-day in-cell program works with pre-release offenders.

### Elderly or Infirm Inmates

The Virginia Department of Corrections manages a 1,100-bed correctional continuing care institution for independent living, assisted living, and skilled nursing care called the Deerfield Correctional Center for males. The medical department operates 24 hours a day. There are on-site dental, lab, and x-ray services. The facility has an 18-bed infirmary and a 57-bed assisted living unit.

Prison-Based Substance Abuse Treatment Programs – Treatment services expenditures totaled \$5,230,000 for the last few fiscal years.

*The Matrix Model* - This program is an evidence-based intensive outpatient treatment modality. The treatment model consists of five components: early recovery, relapse, prevention, family education and support groups.

*Cognitive Therapeutic Communities (CTCs)* - The CTC program is an intensive residential treatment model designed to address substance addiction, criminal thinking and anti-social behaviors.

*Thinking for a Change* - This curriculum uses, as its core, a problem-solving program integrating both cognitive restructuring and social skills interventions.

*High Intensity Drug Trafficking Area (HIDTA) and Start Today A New Direction (STAND)* - The HIDTA/STAND program is a sentencing alternative for drug abusing offenders and technical violators under supervision.

*Behavioral Correction Program* - The program participants are a subset of the CTC program. This program is a sentencing option for offenders with substance abuse needs. Judges are able to place offenders directly into the CTC. Judges impose full sentences with a minimum of 3 years to serve.

*Peer Support Groups* - In both institutions and Community Corrections, peer support groups such as Narcotics Anonymous and Alcoholics Anonymous are provided by volunteers.

### Pre-Release/Post-Release ("Re-entry") Programs

Virginia's Department of Corrections provides several institution-based programming and community-based programming to prepare offenders for release.

Three different programs target different security level offenders. Level 1 offenders receive a 4-month re-entry program called Road to Success. Level 2 & 3 offenders begin re-entry at 1 year from release at a site near their releasing jurisdiction including the last 6 months in a Cognitive Community intensive re-entry program. Levels 4 & 5 offenders are offered re-entry programming based upon their institutional behavior. Approximately 85-90% of discharged inmates from July 1, 2014 to June 30, 2015, completed re-entry programming.

Scheduled classes for release preparation are offered. Intensive re-entry for most offenders is 12 months, 5 days per month, 8 hours per class. Group sessions are restricted to 5 offenders at a time in a secured location to complete the "Think for Change" curriculum or other reentry programs.

Components offered in the re-entry program include: education, job readiness, community resources, housing, substance abuse, rules of post-release supervision, family reunification, cognitive behavior, health care, mental health, and personal identification. In addition, nearly all localities in VA are at some stage of establishing a local re-entry council. Support services include: housing, employment, education, benefits, medical and mental health services, financial obligations, and veterans services.

# WEST VIRGINIA CORRECTIONS PROFILE

## STATE INITIATIVES

### Elderly or Infirm Inmates

The West Virginia Division of Corrections (WV DOC) has no specific strategy for elderly inmates and no legislation has been enacted to address the issue. There are no programs available specifically for the elderly. Some facilities in West Virginia do have units where an attempt is made to house the elderly together.

### Prison-Based Substance Abuse Treatment Programs

The WV DOC has programs such as *ALADRUE*, *Helping Women Recover* and *Therapeutic Communities*.

\**Alcohol & Drug Education, Treatment, & Relapse Prevention (ALADRUE)* was developed to address the needs of incarcerated offenders who have used, abused, or are addicted to drugs and alcohol. The premise of this program is to teach the participants the components of physical effects of drugs and alcohol on the body, the disease of addiction and effective recovery programming.

\**Helping Women Recover* is a treatment program for women who are recovering from substance abuse and psychological trauma in correctional settings. It is based on guidelines for comprehensive treatment for women established by the federal government's Center of Substance Abuse Treatment (CSAT).

\**Therapeutic Community (TC)* program model is based on correctional programs operating nationally that have achieved success in producing safer, more secure living units and lower recidivism rates. The TCs were created in all designated facilities treatment units. These identified TCs will guide and direct the power of social learning as the means to re-socialize a substance abusing criminal population.

### Pre-Release/Post-Release ("Re-entry") Programs

All WV DOC programs are focused on improving the offender's chances at successful re-entry. Examples of the programs offered in West Virginia that help an inmate transition back into society include *ALADRUE* classes along with Women's Classes, Crime Victim Awareness, and DUI/DWI Flex Modules. Inmates also attend outside Alcoholics Anonymous.
